# MEDI-CAL MONTHLY ENROLLMENT FAST FACTS

Characteristics of the Medi-Cal population  
as captured by the Medi-Cal Eligibility Data System  
(MEDS)

The enrollment data included in this document represent only certified eligible counts. Certified eligibles are those beneficiaries deemed qualified for Medi Cal by a valid eligibility determination, and who have enrolled into the program. This classification excludes beneficiaries who have a monthly share of cost obligation that has not been met, as well as other specific populations. Enrollment counts exclude information related to applications received or any other eligibles that may be in the process of becoming certified eligible.

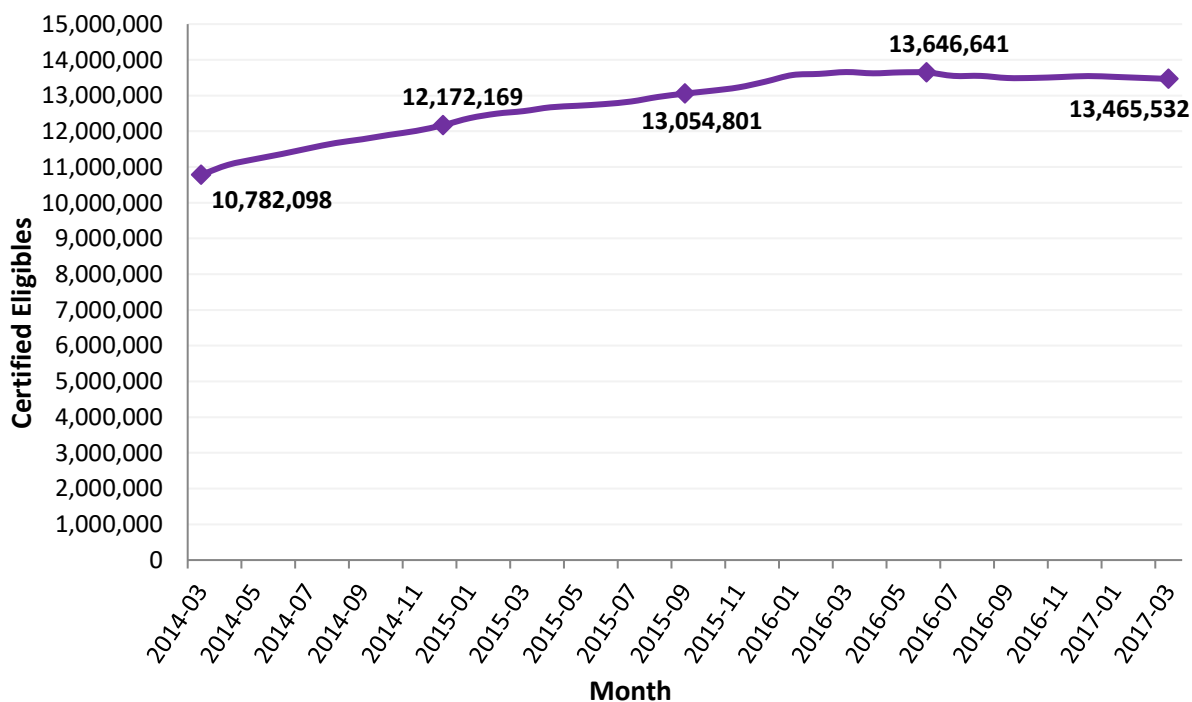

The counts presented are considered PRELIMINARY and subject to change. The certified eligible counts reflected in this document incorporate three Medi Cal eligibility updates and reflect roughly 99.2% of all Medi Cal certified eligibles for the most recent month displayed. A specific month's enrollment count is considered complete for statistical reporting purposes 12 months after the month's end.

Please note that the values presented in figures included in this report may not add up to 100% due to rounding.
